

EZinCMD

In Command with Ezenia InfoWorkSpace

com•mand•er

1. someone in an official position of authority who can command or control others.
2. a person who exercises authority; chief officer; leader.

While serving overseas, a ranking officer in command of a maneuver involving multiple units encountered a combat dilemma. His Reconnaissance unit had pinpointed the location of enemy troops on the move but had difficulty relaying the coordinates quickly to his Fire Control unit.

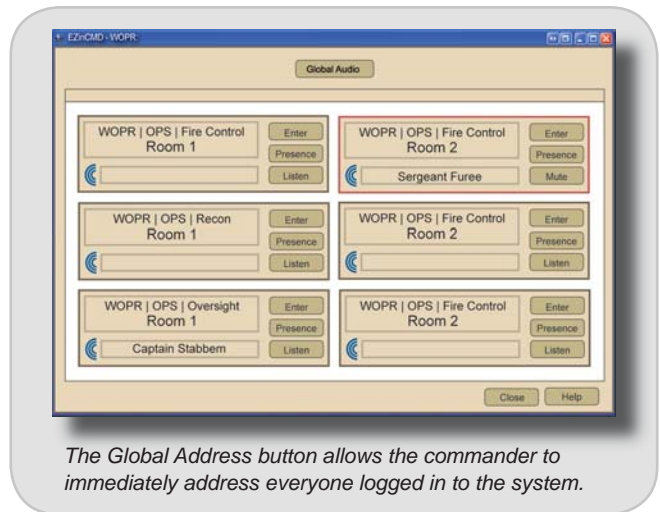

The ranking officer later shared this scenario with the InfoWorkSpace (IWS) development team. Modern combat, he stated, requires the ability to readily combine forces, assemble separate teams on demand, and merge and assimilate knowledge and experience. Reaction time is crucial in order to deliver optimum force and neutralize a threat.

The IWS development team went to work creating a solution: EZinCMD. With the touch of a button, this enhancement gives a commander the ability to assemble key units and merge their capabilities and expertise to react to a crisis in real-time.

EZinCMD provides a commanding officer with a holistic view of his units in action within virtual rooms in IWS and the ability to listen to a multitude of audio traffic, mute selective or all rooms, monitor the

Situation Awareness

Each room where a unit conducts its meeting is shown as an individual element within the EZinCMD window. Elements can

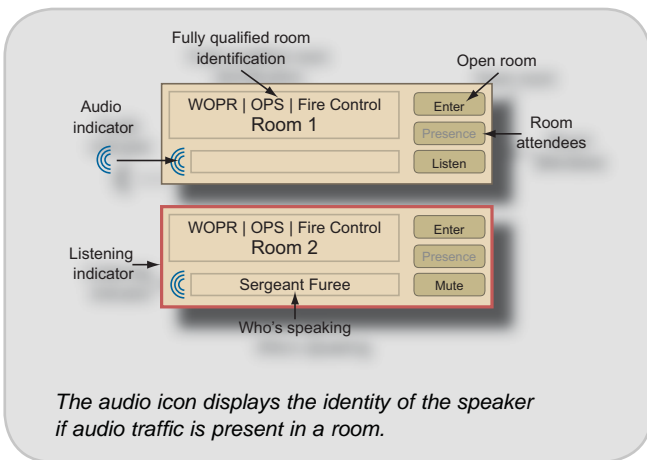

be added or deleted by navigating the system or can be set as defaults upon login. Each element that appears in the EZinCMD window is prominently identified with the room where the meeting is conducted, the floor on which the room is located, and the building in which it resides.

Theater Awareness

In any time-sensitive situation, especially on the battlefield, a commander needs to convene experts from different groups at a moment's notice. EZinCMD allows a commander to simply drag and drop participants from one room into another to create a combined panel of experts - thus facilitating the immediate distribution of information and providing a forum from which participants can effectively leverage diverse areas of expertise.

EZinCMD is another valuable feature in Ezenia's 3.0 product release. For a demonstration, contact your Ezenia sales representative today.

presence of current attendees in each room, and move attendees from one room to another. Most importantly, the officer can instantly combine all participants into a single target meeting, resulting in a more timely response to a battlefield situation.
